विषय :- मेरा बेटा सिनु कुमार के इलाज हेतु प्राथमिक /
महोदय,

सविनय निवेदन यह है की मेरा नाम
सुरेश कुमार है, मैं पेश से एक हाइवेल् कमी हूँ; मेरा
बेटा सिनु कुमार है जिसका उम्र 2 वर्ष है,
कुछदिन पहले मेरा बेटा खेलते समय डाक की

चपेट में आ गया जिससे उसका चेहरा, छाती, हाथ-पाक
छुरी तरह से जल गया, जिसका इलाज उपोली वर्न
अस्पताल (पटना) में चल रहा है। अस्पताल द्वारा इलाज
का खर्च 4,60,000/- (चार लाख साठ हजार)

बताया गया है जिससे कानों में भी छुरी तरह से असमर्थता
क्योंकि मेरी आर्थिक स्थिति बहुत ही खराब है।

अतः श्रीमान से अनुरोध है की मेरे बच्चे के
इलाज हेतु आर्थिक सहायता प्रदान करने की कृपा
की जाए।

अस कार्य के लिए मैं महा आपका आभारी हूँ।

ग्राम- नागा रोड
थाना- रक्सौल
जिला- मुर्शिदाबाद।

साथ
सुरेश कुमार

Dated: 01.01.2017

PROFORMA INVOICE / FUND REQUISITION REPORT:

PROJECT UNNATI'

(A Bihar Burn & Trauma Research Center Pvt. Ltd. Initiative)

Patient Name: Master Shinu Kumar

Sex: Male Age: 2 Years

Father's Name: Sri Suresh Kumar

Address: Naga Road, In Front of SDBM Women's College, Raxaul, East Champaran, Bihar - 845305

Diagnosis: Approx 35% TBSA Thermal Burn with Oro-Respiratory Inhalation Injury

Date of Accident: 31st December, 2016

Date of Admission: 01st January, 2017

Overall Analysis:

The patient - Master Shinu had been brought in to our Patna Unit (Appolo Burn Hospital) by his relatives and Father - Sri Suresh Kumar at 3 AM on the 01st of January 2017. The child sustained Thermal Burn Injury due to a fire resulting from a leaking LPG cylinder. He was standing near his father who in an effort to fix a leaking LPG cylinder at home, lit a matchstick to check the leakage. A sudden explosion occurred which resulted in his injury. The father, Shinu and his sister Srijana were all injured with mostly 2nd & 3rd Degree Deep burn injury. The burn injury on both feet, legs, arms and wrists of Shinu is mostly 2nd Degree Deep. He has however seriously injured his face which is a matter of grave concern and is life threatening. During the course of treatment we plan to follow an intensive care approach, anticipating any possible respiratory distress. We will eventually employ Surgical Skin Grafting and other wound dressing and debridement procedures to close the wound as early as possible. Physiotherapy sessions would also be advised to achieve the best possible results against a possible respiratory collapse and a contracture free recovery.
